

Antique™

biodegradable

Manufacturer of Bagasse Products

At Antique Biodegradable, we take pride in being at the forefront of the green revolution, crafting innovative biodegradable products that contribute to a healthier planet. Our commitment to environmental sustainability is not just a business philosophy; it's a way of life. In our journey towards a greener future, we are delighted to announce our collaboration with the global movement.

By choosing Antique Biodegradable products, you not only make a conscious choice for a sustainable lifestyle but also contribute to the Green Environment Movement. Together, we can make a difference. Bagasse products, which are made from sugarcane waste, can be a more sustainable alternative to traditional disposable products made from non-renewable resources such as plastic or styrofoam. Here are some key sustainability factors to consider when it comes to bagasse products.

Renewable Resource :

Bagasse is, therefore, a renewable resource since it is a byproduct of sugarcane manufacture at the mills and is continually renewed without reducing finite resources.

Reduced Waste :

Using bagasse products would be one way to reduce waste while also diverting sugarcane waste from the landfill, which is usually disposed of carelessly in the environment, from an alternative to single-use plastic use.

Compostable :

Bagasse products are biodegradable, meaning that they will break down naturally over time without leaving harmful residue in the environment.

Lower Carbon Footprint :

Bagasse products, thus, have a low carbon input as opposed to conventional disposable products made from nonrenewable resources they consume less energy during production. Many of them can likewise be produced locally in many parts of the world.

#Greenology

- ✓ Natural: Made from 100% Natural Renewable Sugarcane Fiber
- ✓ Non-Toxic: No Toxic Additives
- ✓ 100% Biodegradable and Compostable
- ✓ Recyclable: Can be recycled or Reused to make Paper and PaperRelated products.
- ✓ 100% Food Grade
